

WHITE-LABEL TECHNICAL PRODUCTION

Technical drawing sample pack

Anonymised examples of residential and commercial technical production by Hunter Ellis.

Building Regulations packages | Technical amendments | Specifications and details | Building Control responses

Prepared as a capability overview. Project information has been anonymised and images are illustrative extracts rather than complete construction issue sets.

RESIDENTIAL | BUILDING REGULATIONS

Garage conversion package

Coordinated plans, sections, elevations, construction details and project-specific notes developed for conversion of an existing garage into habitable accommodation.

Representative scope

- Building Regulations coordination
- Plans, sections and construction notes
- New-to-existing junction development

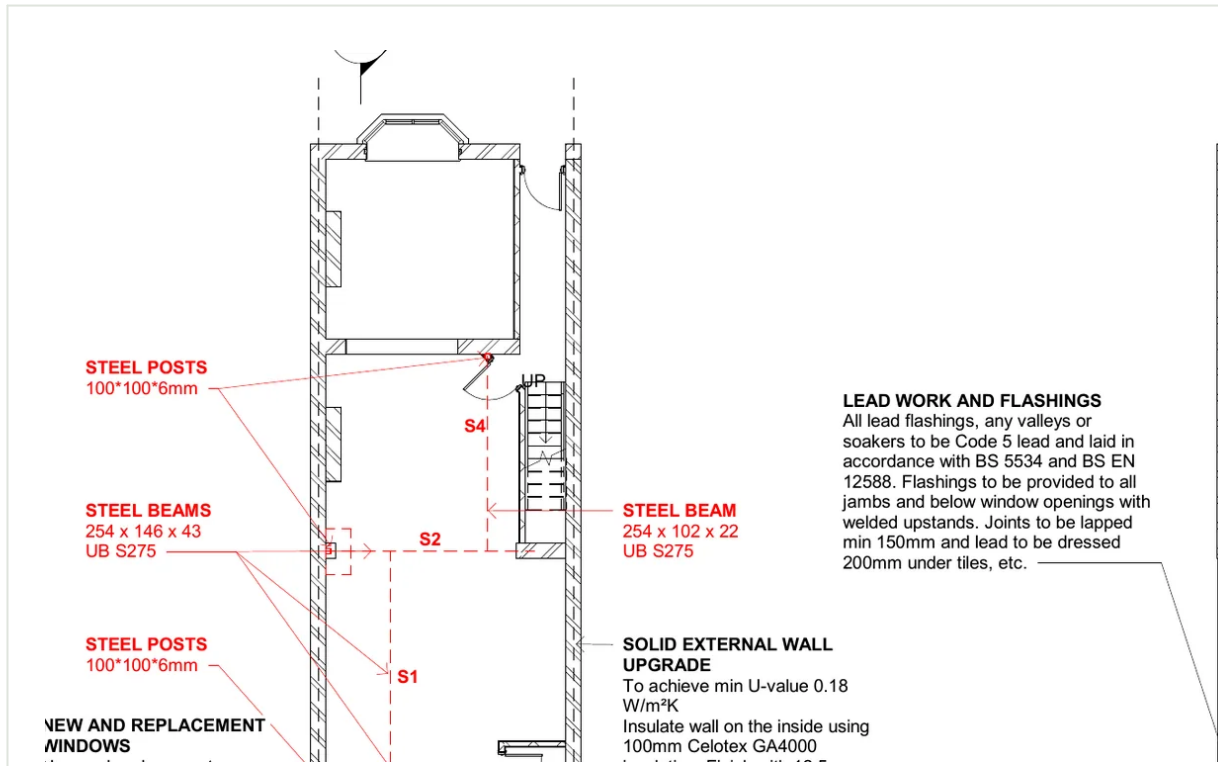

Selected drawing extract - information intentionally anonymised

Single-storey extension

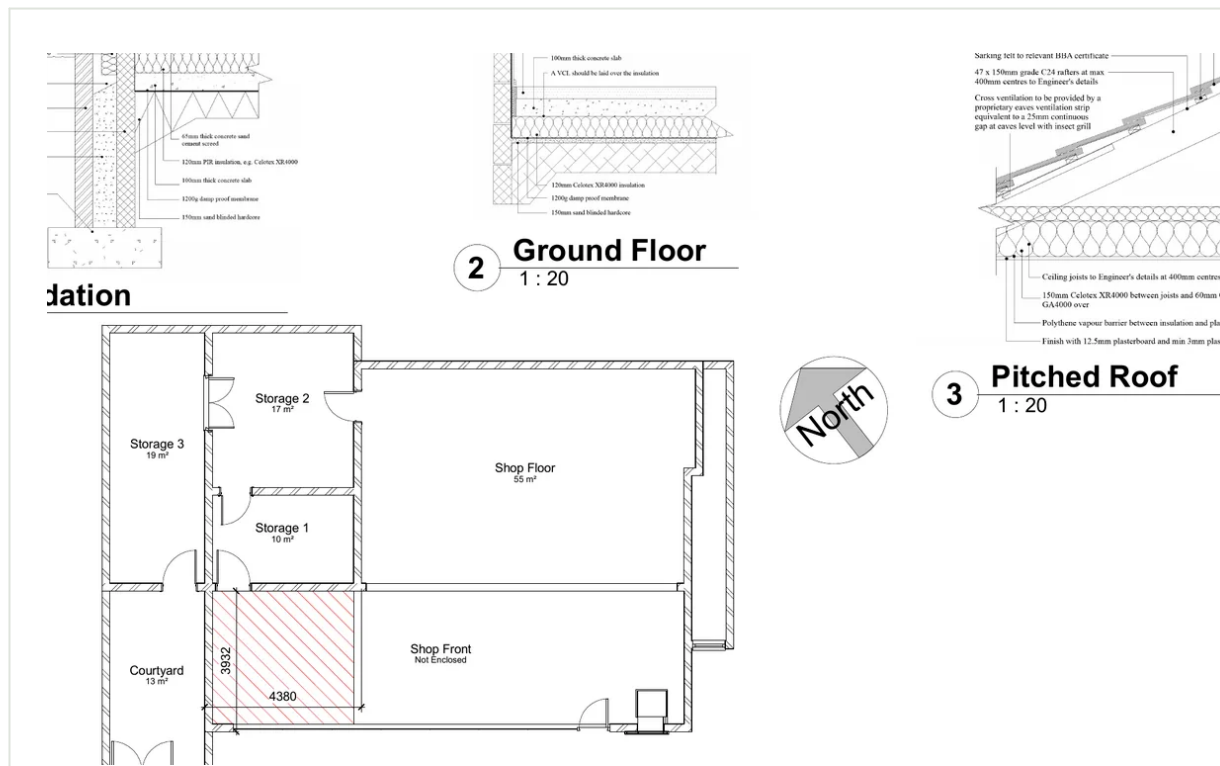

Technical development of an extension from proposal information through to a coordinated Building Regulations set, aligning architectural intent, structural input and key junctions.

Representative scope

- Technical drawing production
- Structural-information coordination
- Revisions and design development

Selected drawing extract - information intentionally anonymised

COMMERCIAL | BUILDING CONTROL

Commercial alterations

A commercial technical package developed through revisions and Building Control review, with drawings, details and responses kept coordinated as project information evolved.

Representative scope

- Technical amendments
- Building Control comment responses
- Construction details and specification support

Selected drawing extract - information intentionally anonymised

WORKING ARRANGEMENTS

Clear support, agreed before work begins

Hunter Ellis provides flexible technical capacity for architectural practices, surveyors, contractors and developers across the UK. Work can be supplied discreetly under the commissioning business's brand or with Hunter Ellis named as technical consultant.

	Basic drawing commissions normally take 1-4 weeks. Larger measured-survey, coordinated technical and specification packages may require up to three months.
	Two rounds of reasonable revisions are included within the agreed scope. Material brief changes are agreed separately.
	PDF issue as standard, with JPEG copies available where useful. The editable Revit source file may be purchased for an additional agreed fee.
	White-label delivery is available and Hunter Ellis can sign a project-specific non-disclosure agreement when required.

Every commission is priced individually following review of the brief, available information, required deliverables and programme.
